Subject: Re: Astroptx Wholesale Optics

Newsgroups: sci.astro.amateur

View: [Complete Thread \(32 articles\)](#)

Date: 2000/02/18

[Original Format](#)

The thread on Astroptx.Com has been rather lengthy. However, I believe that we should continue to add on it every now and then for the sake of those potential clients who would be looking for some feedback regarding others' experience in dealing with Astroptx.

On Feb. 8 I bought a Celestron G-5 SCT w/ motor and optional accessories. Based on that transaction, personally, I would rate them from 1-10 (10 as perfect score) as follows:

1. Price: 9 - They are certainly the cheapest. They quoted the scope (motor included) to me at \$629. Their accessories too for this scope are among the lowest if not already the cheapest among its class. All brand-new.

They will beat any price, just tell them where you got that price, what catalog or internet, what site or company and they will try to give you the best deal for that same item.

However there is a caveat. They charge a 3% surcharge for credit card purchase, non however for checks. This certainly was a bombshell since it is not mentioned in their ads nor did they inform me outright in all our correspondences. I came to know about it only when I have already decided to finally make a purchase. Nonetheless, I still saved substantially and that is not something to lament about.

Btw, this is a Father and Son business, so there are two Fred Pauli, Sr. and Jr. The one I talked to over the phone is the Jr. and the one who often answered my **emails** is the Sr. I came to know about it only after three **emails** when I decided to phone them. Sometimes they quote different prices for the same product. It happened to me, best always therefore to quote to whoever you are dealing with the lowest price

given to you.

2. S/H: 9 They quoted \$29 for all the merchandise I bought.

At that time I made the order I was out of town but made instructions when to deliver the merchandise. It was originally set to 21 Feb. since nobody would be home before that time to sign the UPS receipt. Later, due to some change in schedule, I emailed them instructing them to deliver it to my sister's home address on Feb. 14 since there would be somebody to sign the receipt by then. I asked also that the UPS **tracking number** be emailed to me. Twice I emailed them on this matter. Their response came two days late. But notified me that they took note of the changes. February 16 came and I have not received any notice from Astroptx as to whether they have shipped the scope. I called Fred. He said that they have **not shipped** it yet thinking that it should still be shipped on the 21st -- the old date. I have reminded him of our email correspondences and the changes I made. He apologized and promised to ship it the same day. On my initiative to remind him formally of the change, I sent him a fax. That same day I received the **tracking number**.

Their ad mentions that some products are shipped free. This is true with the Meade Dobs and EQs which are shipped directly by the manufacturer to the customer.

3. Email response: 8 - In about two instances they responded to my **emails** a day or two late. Their answer to my inquiries were rather telegraphic notwithstanding that I wrote and inquired on details and their expert opinion.

4. Expert Advice: 10 - I was suffering from a mild aperture fever and was wavering on what to get a G-5 or a G-8N Cat-Nwt. At first I was intent on getting a G-5 but after reading about the G-8N and inquiring about it through other websites, I decided to get that instead. So I faxed my order for a G-8N (their quote was \$629). Fred Pauli emailed telling me that the G-8N had a serious optical flaw and Celestron would deliver the corrected product probably by late Spring. He wanted my advice as to what to do. I really appreciated that gesture because although they have the G-8N on stock he opted to refrain from selling me an outright defective scope.

5. Quality - 10 - They are the same proprietary products of the brand name Telescope companies.

6. After-sales support - Product comes with a one year warranty. But I have yet to receive the scope to see how it is. I will inform you later

when I have inspected it.

Over-all, I give them a 9/10. I would buy from them again. I am already infact listing the things that I need to purchase. I planning later in Spring to get me a G-8N. :)

Eaton

P.S.

They quoted me these prices w/c are not listed in their online catalog:

1. ETX 90 RA - \$395
2. ETX 90 EC - \$559
3. Autostar - \$129
4. G-3 - \$429
5. G-3 w/motor - \$479
6. G-8N - \$629
7. G-5 w/motor - \$689
8. G-8 - \$849
9. Nextstar 5 - \$1095.
10. S/H for scopes - \$29 (Continental USA).

I say that the great prices of these items you simply could not beat.
